Amendment "A"

Amendment to the Specification:

Please replace the Abstract at page 16, lines 3-11 with the following paragraph:

--The invention includes a method, a computer readable medium, and a system for automated form completion for a user of a computer. In one regard, the method includes the steps of identifying one or more fields in a form and then automatically supplying information corresponding to the identified fields without intervention by the user. In one implementation, a computer readable medium is embedded with a computer program configured to perform the above mentioned method. A system of the invention includes a field identifier module capable of identifying one or more fields in a form and a field completer module capable of supplying information corresponding to the one or more identified fields without intervention by the user.--
